2. Signs and Markers

The mine ID signs are located at the contact points of the public road to the permit area and contains all of the appropriate information. All other signs and markers observed during the inspection were in compliance with the approved MRP.

7. Coal Mine Waste, Refuse Piles, Impoundments

The refuse pile is being mined in a lift. Positve drainage from the pile is taking place. The pile appeared stable. No visible hazards noted.

A visit by the Division and Conoco-Phillips took place during the inspection to look at the proposed post-mining application to allow a portion of the permit to be removed to develop a gas well.
